

# Send Email Notifications via Logic App

## Assignment

Set up a Logic App to send email notifications after the [pipeline](#) completes, with success or failure status based on [pipeline](#) execution. This includes connecting ADF to Logic Apps and configuring alerts.

The screenshot shows the Logic App Designer interface in the Microsoft Azure portal. The workflow is named 'lgappemail'. The trigger is 'When a HTTP request is received'. The action is 'Send an email (V2)'. The email configuration is as follows:

- To: pragati.kulshreshtha@simformsolutions.com
- Subject: ADF Pipeline Status: status
- Body: Hello, The pipeline pipelineName has status Run ID: runid Regards, ADF Notification System

The screenshot shows the Pipeline expression builder interface. The JSON expression for the 'status' field is:

```
{  "pipelineName": "@pipeline().Pipeline",  "runid": "@pipeline().RunId",  "status": "success"}
```
