## Power Query Assignment

• Create queries to connect to all .csv files in the folder into power query

- Confirm that column headers have been promoted and that all data types are correct.
- Add a new column to extract all characters before the dash (""-"") in the Product SKU column, and name it "SKU Type"

- In the new column, remove all text/characters except for the domain name.
- Use transformation steps to clean up and capitalize the domain names (i.e. "Adventure Works")

## b) Numeric tools

• What is our average product cost?

How many colors do we sell our products in?

```
f_X = List.NonNullCount(List.Distinct(#"Replaced Value"[ProductColor]))
```

· How many distinct customers do we have?

```
f_{x} = Table.RowCount(#"Renamed Columns1")
```

What is the maximum annual customer income?

• Return the tables to their original state

## c) Date Transformations
